

## SAFETY ESCAPE ROOM

## LEARNING AREA THAT ALLOWS FOR MISTAKES

**LEARNING BY DOING IS IMPORTANT. BUT WHAT IF ONE MISTAKE ALREADY TURNS INTO AN ACCIDENT? BY USING THE MOBILE SAFETY ESCAPE ROOM WE CAN CREATE A SAFE WORK AREA THAT IS MADE IN SUCH WAY THAT IT ALLOWS FOR MISTAKES AND HELPS TO TRAIN PEOPLE.**

### INTRODUCTION

Many incidents still occur in business. The reasons for this may, among other things, have to do with time, money and safety awareness within the company.

Number 1 of the most common accidents at work is working at height. The movement behind this may be that an employee would like to finish his work before he will leave. How easily is it to climb the ladder, without fall protection. Contact with moving parts of a machine is number 2 in the same list of most common incidents. A cause for this may be that a protective cover has been missing for a while and that replacing will cost a lot of money. In this case, the management may have decided that other activities have a higher priority and that replacing the protective cover must wait a little longer.

This escape room is aimed at showing what the consequences are as a result of negligence or incorrect action. Thereby the colleagues must work as a team to be able to leave the truck in a healthy and safe way. With this aspect, the escape room is also a fun activity for teambuilding.

### SUBJECTS AS AN EXAMPLE

- Health and environmental safety
- Major accident prevention (MAPP)
- Safety procedures
- ATEX
- Lock Out Tag Out (LOTO)
- Digital Safety Passport (DSP)
- Report incidents
- Personal protection
- Work instructions

### UNIQUE SELLING POINT

- Available at every location
- 80 attendants per day
- Fun and educational
- Possible to implement during the day and the work
- Teambuilding

### IN WHICH WAY CAN AN ESCAPE ROOM BE EDUCATIONAL?

The escape room is a realistic way of learning. It connects employees to each other and they learn to show safe behaviour and to deal with dangerous situations within a comparable working environment.

Your employees are made aware of the dangers of an unsafe workplace and unnecessary safety actions. The aim is to optimize the behaviour of employees towards dangerous situations.

In total the escape room takes 45 minutes. 30 minutes of this is the duration of the safety game. At the end will there be an evaluation with the safety expert, who is also present during the game.

The safety expert can also come from your organisation.

### SUITABLE FOR VARIOUS SECTORS, SUCH AS

- Offshore
- Petrochemical
- Fire Brigade
  - BVD 400 Commanding officer
  - COM 500 Communication
  - OGS 1000 hazardous substances
